

We at Marciano Family Optometric are pleased to provide our patients with advanced digital retinal imaging and peripheral visual field screening examinations to better monitor your eye health.

This digital retinal image is a high resolution photograph of your retina which will help us document, review and compare your eye health over time.

Normal retina

Macular Degeneration

Glaucoma

Diabetic Retinopathy

EACH OF THESE PATIENTS HAD 20/20 VISION!

You can expect from this exam:

- An annual eye wellness digital image and visual field analysis
- An in depth view of the retinal surface (where eye diseases first manifest)
- A permanent record for your medical file for analysis and comparison
- To be fast, easy and comfortable, often without dilation drops

Since insurance will only pay for retinal photos after eye disease is discovered the Digital Retinal Images and Visual Field analysis are an out of pocket expense.

Drs. Mark and Brandee Marciano recommend this procedure for all of their patients and will perform these tests for an additional cost of \$25.00 to the comprehensive eye exam you are receiving today.

Our staff or our Doctors can answer any questions you may have.
